

WEED ALERT

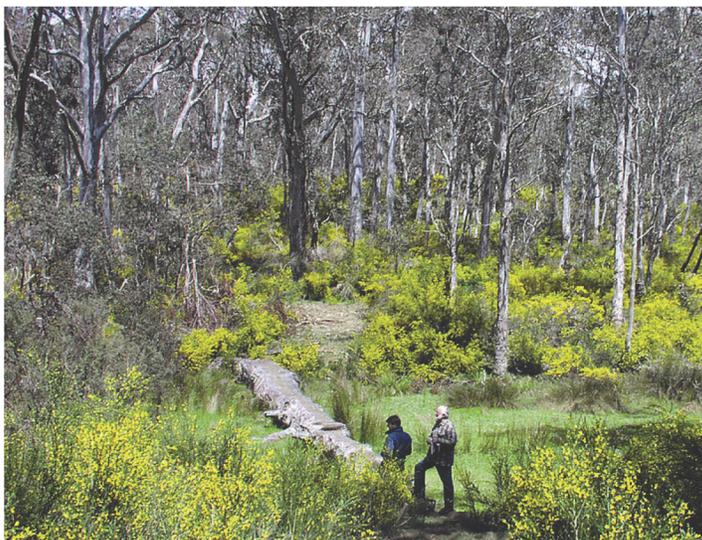

Scotch Broom, Invasive Perennial!

Scotch Broom is one of the most extensive forest weed species that was introduced as an ornamental along highways and as a dune stabilizer.

The evergreen shrub grows 3 to 10 feet high, and produces up to 20,000 seeds per plant. In May it is covered with bright yellow pea-like flowers.

Scotch Broom easily invades disturbed sites, natural areas, dunes and forest lands.

Plants should be bagged and placed in the garbage or treated with herbicides.

Do not compost or burn plants with seed pods.
